

COLE CROPS (Brassica)

BIO INFUZE

MICROBIAL INOCULANT

Bio-Infuze is a highly concentrated blend of beneficial bacteria and endomycorrhizal species and other beneficial fungi. Mycorrhizal fungi colonize roots and extend into the surrounding soil. When this fungi/bacteria/plant link occurs, it greatly increases the root's ability to absorb water and nutrients. This may result in enhanced plant growth, vigor, and tolerance of environmental stress. This product must come in contact with the growing roots.

APPLICATION INSTRUCTIONS:

GREENHOUSE: Add 1lb of Bio-Infuze COLE CROPS (Brassica) with water to make 1.5L (0.4gal) of solution. Use a proportioner such as Dosatron at 100:1 ratio. This will yield 150L (39.6 gal) of dilute solution. You will do 2 passes at ½ rate for each pot to insure good coverage.

FIELD: Add 1lb Bio-Infuze COLE CROPS (Brassica) to 10 to 50 gallons of water to cover 1 acre. May be applied through irrigation or sprayed & watered in.

Keep the Bio-Infuze Cole Crops solution agitated.

APPLICATION TIMING:

SEEDED PLANTS: Apply just after first true leaf emergence.

Formulated specifically for Broccoli, Brussel Sprouts,

Cabbage, Cauliflower, Kale, Turnip
